Email Builder update: Changes to unsubscribe links

In our continued efforts to protect our high email deliverability standards, Keap's Advanced Email Builder no longer allows for modification to the Unsubscribe Link Text that appears at the bottom of emails created with the Email Builder.

Bug fixes

- When printing a Referral Partner Ledger Report for a specific date range, data from the beginning of the month to the end of the month was printed regardless of the date range entered. (Known Issue 2050026)
- We have observed cases where, in some situations, applications experienced a temporary disappearance of the API settings from the admin section of the application. This led to API calls being rejected until the settings reappeared. (Known Issue 1841235)
- When previewing a Merged Letter created by a campaign, some letters were downloaded as a .jsp file instead of a .doc file. (Known Issue 2082090)
- Some apps whose time zone is in Europe, Asia, Africa, or Australia duplicated charges for subscriptions with a "next bill date" of 7/1. These subscriptions were charged on 6/30 and 7/1. (Known Issue 2094772)
