# How To Test Just About Anything 🔗

This article applies to:

Test a web form

You can test web forms on-the-fly while you are creating them in the Campaign Builder.

1. Make sure to publish any changes you've made to the form before you test it.
2. While viewing the web form, click the **Test** button at the top of the web form and choose your user record from the drop-down menu.

3. Fill out your form and click the **Submit** button.
4. Close the thank you page.
5. Click the arrow to go back.
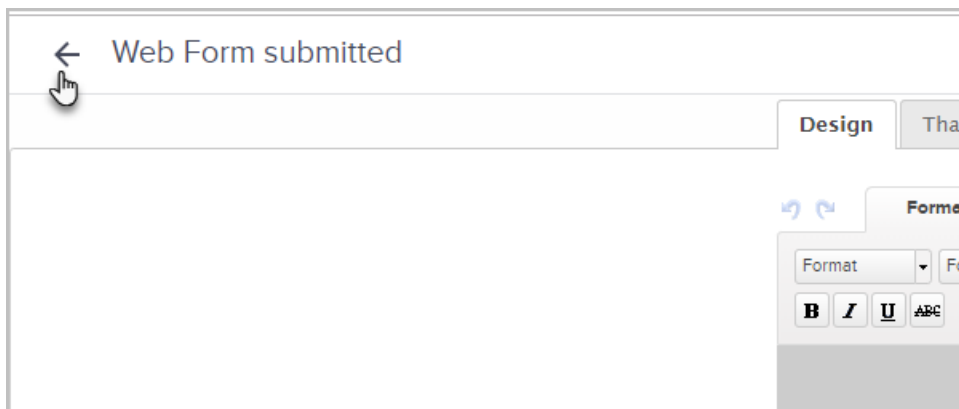

6. Click the close button to leave the campaign builder.
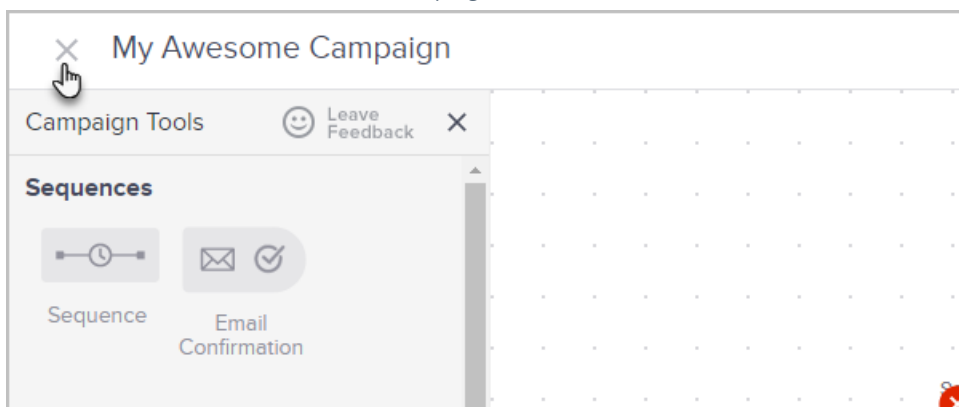

7. Find your contact record in Max Classic, scroll down to the *Form Submission* section to get details on when the form was submitted and what information was obtained.

Test an Order Form

The easiest way to test an order form is to run an actual transaction with your credit card or PayPal account. If this isn't possible, and you use an Authorize.Net merchant account, you can put the Authorize.Net merchant account into "Simulator" mode and fill out the order form. In simulator mode, all transactions are approved, but no actual financial information is sent through the gateway.

> Simulator Mode Warning! Make sure not to leave your Authorize.Net merchant account in Simulator mode! Also, make sure your Authorize.Net merchant account isn't presently active on an existing order form or the shopping cart. In simulator mode, ALL transactions will always be approved!

To test an order form with an Authorize.Net account in "Simulator" mode:

1. Go to **E-Commerce > E-Commerce Setup** in the main navigation menu.
2. Click on the **Order Forms** link.
3. Click on the name of the order form you want to test.
4. Click the **Links** tab.
5. Click on the link to open the order form.
6. Fill out the form using a test credit card number. For example, VISA; 4111111111111111; 01-2025; 123.
7. Go to the contact record in Max Classic and make sure the items were added correctly to the order. If the product you purchased is part of a purchase goal in a campaign, make sure the campaign goal was accomplished correctly. Also, if you have billing automation set up, check that too!

Test your Shopping Cart

The easiest way to test your shopping cart is to run an actual transaction with your credit card or PayPal account. If this isn't possible, and you use an Authorize.Net merchant account, you can put the Authorize.Net merchant account into "Simulator" mode and fill out the shopping cart. In simulator mode, all transactions are approved, but no actual financial information is sent through the gateway.

> Simulator Mode Warning! Make sure not to leave your Authorize.Net merchant account in Simulator mode! Also, make sure your Authorize.Net merchant account isn't presently active on an existing order form or the shopping cart. In simulator mode, ALL transactions will always be approved!

To test your shopping cart with an Authorize.Net account in "Simulator" mode:

1. Go to **E-Commerce > E-Commerce Setup** in the master nav menu.
2. Click on the **Shopping Cart Themes** link.
3. Click on the thumbnail of your Active Theme to go to your shopping cart.
4. Add items to your cart and checkout.
5. Go to the contact record in Max Classic and make sure the items were added correctly to the order. If the product you purchased is part of a purchase goal in a campaign, make sure the campaign goal was accomplished correctly. Also, if you have billing automation set up, check that too.

Test a Campaign

1. Go to **Marketing > Campaign Builder** in the main navigation menu.
2. Click on the name of the campaign you wish to test.
3. Complete the goal that begins the campaign. For example, if the first goal of the campaign is to submit a web form or add a tag, do so now.
4. Find the contact in Max Classic you tested with and scroll down the page and click on the **Campaigns** tab.
5. From here, you can see what campaigns this contact belongs to as well as all of the individual marketing pieces of the campaign.
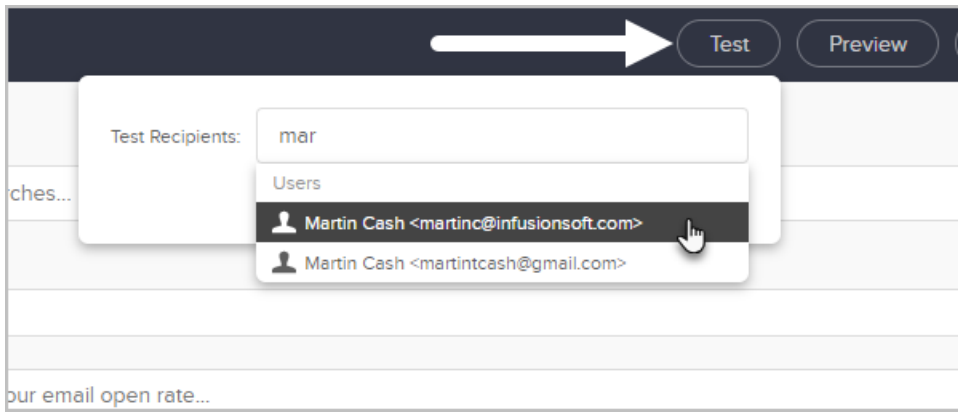

Test an Email in a Campaign Sequence

While viewing the email in the campaign sequence, click the Send Test button and select a user from the drop-down.

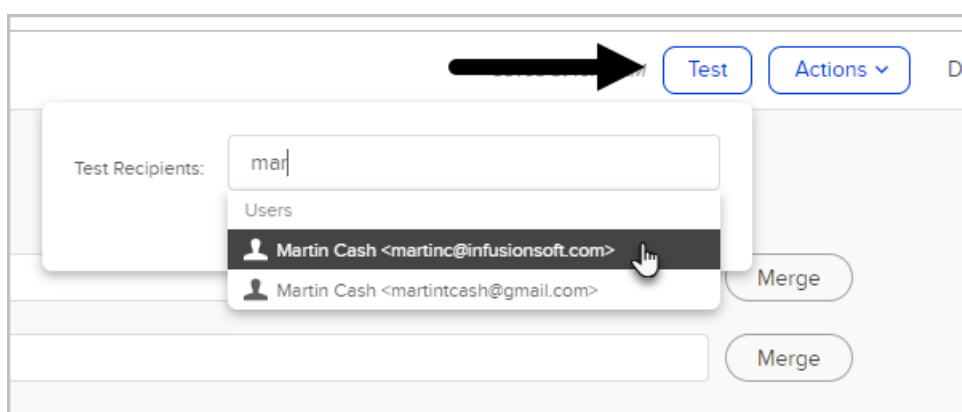

Test a Broadcast Email

When sending a broadcast email, you can test the email on-the-fly while you are building it. Just click the Send Test button at the bottom of the page.

Test a Credit Card Processor (Merchant Account)

1. Go to **E-Commerce > Settings** in the main navigation menu.

2. Click on the **Merchant Accounts** link.

3. Click the **Edit** link next to the merchant account you wish to test
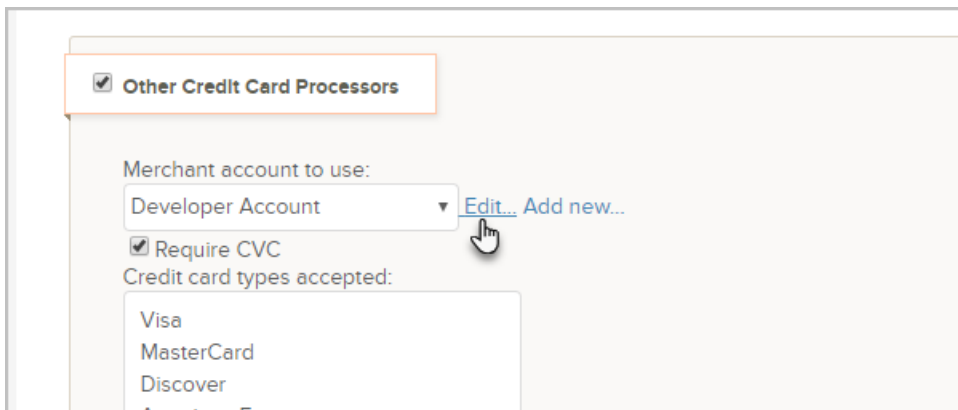

4. Make sure the merchant account is in Live Mode.

5. Click **Save** to save your changes (if necessary.)

6. Now, you can go to your contact record and create an order using the merchant account you want to test. If successful, you will get an "approved" message from the gateway. If it doesn't work correctly, you will get an error message with an error code.
