

# Custom unsubscribe and opt out links

This article applies to:

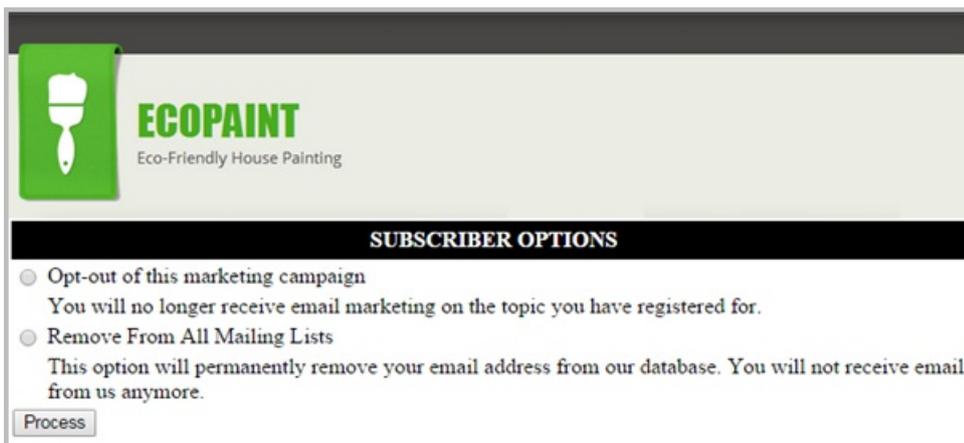

**Legacy Notice:** This article refers to a feature that is used with legacy broadcast emails which are created in **Marketing > Templates**.

There is a default unsubscribe / opt-out link displayed on the bottom of every broadcast email. Because broadcast emails are considered marketing emails, they are subject to the requirements of the [CAN SPAM Act](#) and therefore the opt-out links cannot be removed. You can replace the opt-out links with custom opt-out links.

Please note that custom unsubscribe / opt-out links are not supported in the campaign builder or when sending a broadcast using the modern email builder.

Each custom unsubscribe / opt-out link offers up to two options:

- **(Optional) Remove from series of emails:** You can set up an alternative unsubscribe option for each opt-out link. This option allows an email recipient to unsubscribe from one series of emails and continue to receive other broadcast and sequence messages.
- **Remove from All Email Marketing:** When an email recipient selects this default option, their email status changes to "opt-out" in Max Classic. The system will skip this person's email address when sending Broadcast and Follow-Up Sequence emails. You can also set up global actions that run whenever someone chooses the "Remove from All" through Marketing > Settings > Email Defaults.

**SUBSCRIBER OPTIONS**

Opt-out of this marketing campaign  
You will no longer receive email marketing on the topic you have registered for.

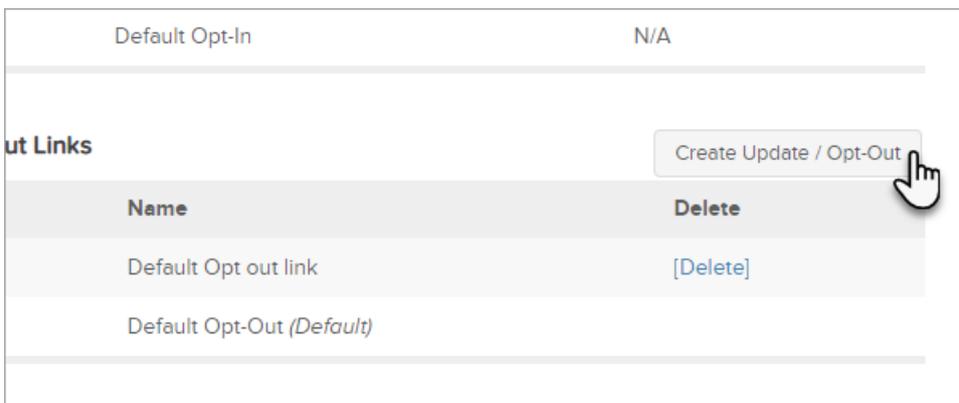

Remove From All Mailing Lists  
This option will permanently remove your email address from our database. You will not receive email from us anymore.

Process

1. Navigate to **Marketing** and click **Settings**.
2. Click on **Automation Links**.

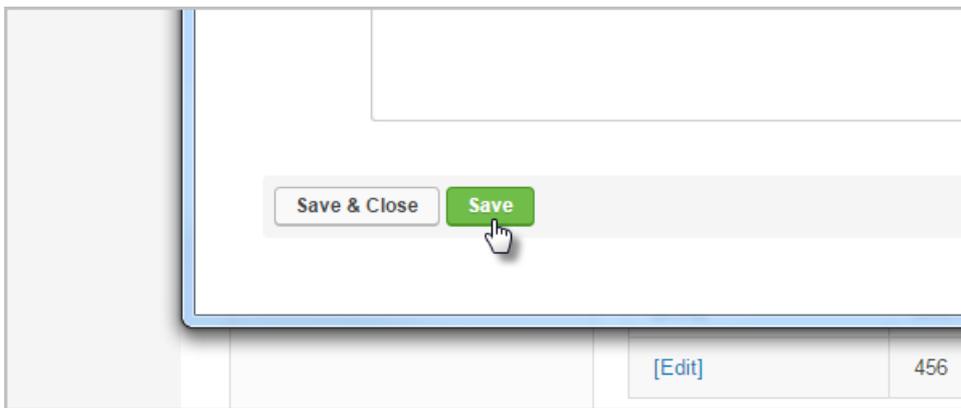

3. Click on the **Create Update / Opt-Out** button to add a new link.

- **Name:** Enter a name (email recipients won't see this name). It should be short and descriptive.
- **Type:** Select Opt-Out from the drop-down.
  - The opt-out link sends visitors to a confirmation web page that is hosted in Max Classic. This page displays a message asking the person to confirm their desire to opt-out of all email marketing and (if configured) offers the alternative option allowing email readers to unsubscribe from one specific series of emails.
- **(Optional) Link Blurb (HTML Email Display):** Click on the Edit tab to add text or images that will show up above the opt-out link.
- **Link Text:** This text shows as a hyperlink in HTML emails. The recipient will click on the words you enter here; e.g., "Unsubscribe".
- **Link Blurb (Plain Text Email Display):** This message will show up above the link in plain text emails; e.g., "Click the link below to unsubscribe." Note: You are not able to mask links with text or images in a Plain Text email.

4. Click **Save** to create the link.

5. (Optional) Scroll down to the Opt-Out Page Display Information section. Use this area to add an alternative unsubscribe option such as to choose between unsubscribing from of all of your email marketing or only one series of email marketing messages.

- Opt-Out Header: Enter the name of your email series; e.g.;10 Must-Dos Tips Series.
- Opt-Out Description: Enter a more detailed description of the emails; e.g., Choose this option if you want to stop receiving the 10 Must-Dos tip emails, but want to continue to receive other messages from Fully Baked Co.
- Click on the Actions tab. Note: You must add actions to adjust the follow up.
  - If the person is unsubscribing from a broadcast series, then you need to remove the tag you use to identify the broadcast list.
  - If the person is unsubscribing from a series of messages that are delivered through a legacy follow-up sequence, then you need to remove the tag and stop the follow-up sequence.

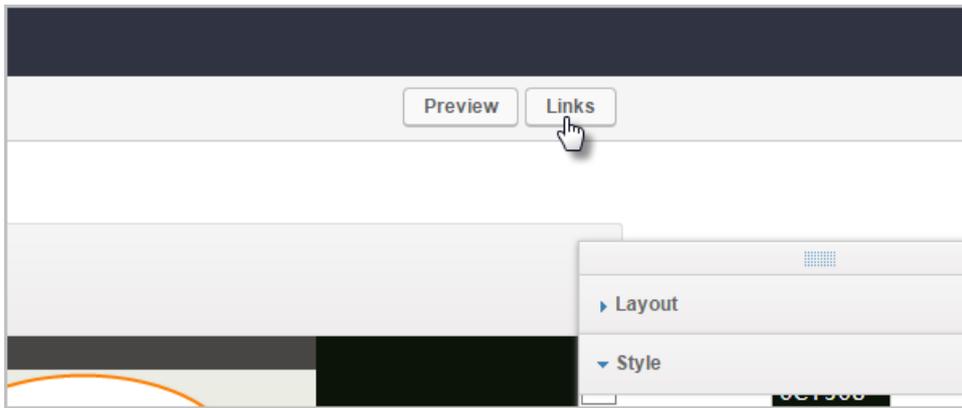

6. Click **Save & Close**.

7. Navigate to **Marketing** and click **Templates** to insert the custom double opt-in link into the corresponding emails.

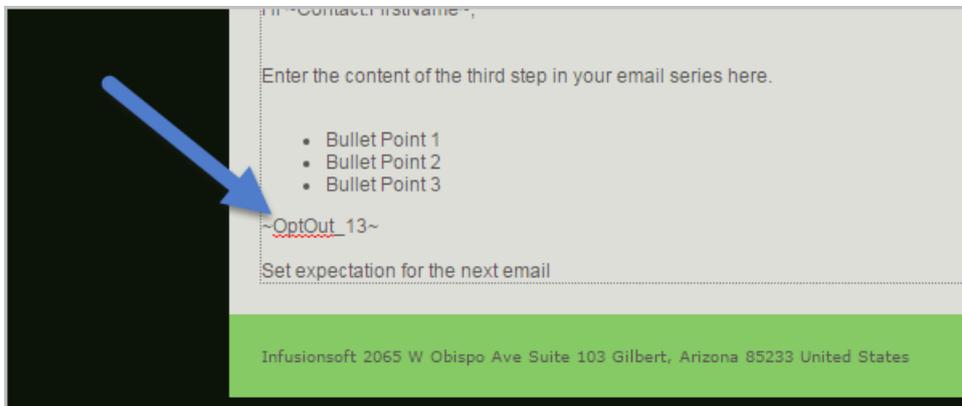

8. Open your email to edit it with the drag & drop builder. Click inside the email where you want to insert the link.

9. Click the **Links** button to choose the link you created. You can also set up these links while you are creating the email.

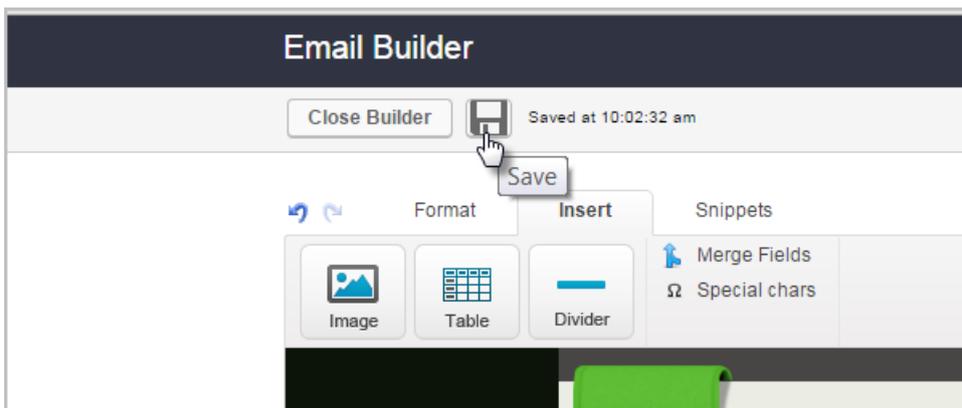

Code Builder: If you build your emails using the Code Builder, you will need to click the arrow on the **Merge** button to find the Merge Fields option.

10. The double opt-in link merge field shows up in the email.

11. Click the **Save** icon to save the email update and click **Close Builder** to return to the email template.

12. Scroll down and click on the **Save** button to apply the updates to the email template.
