

Opt-out Web Forms From Automatic Bot Detection 🔗

This article applies to:

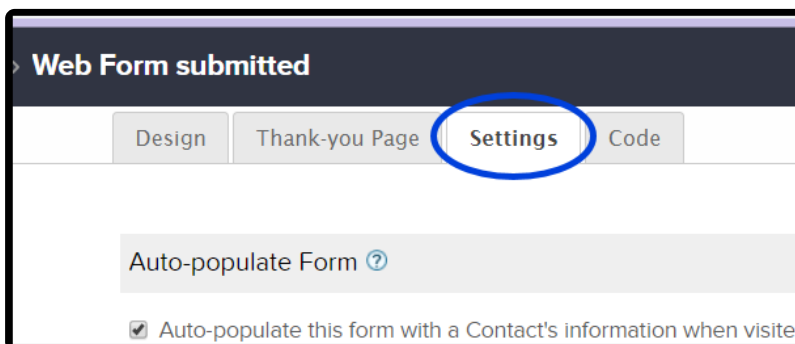

First, [click here](#) to learn more about Web Form Bot Security

This article will show you how to turn off Bot Detection on your Max Classic web forms.

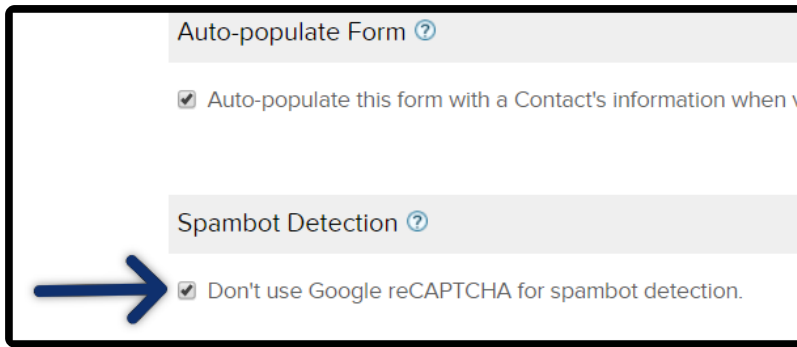

1. Go to the campaign that contains the web form that you want to configure
2. Double-click the web form goal

3. Click on the Settings tab

4. Check the box, "Don't use Google reCAPTCHA for spambot detection."

Auto-populate Form [?](#)

Auto-populate this form with a Contact's information when v

Spambot Detection [?](#)

Don't use Google reCAPTCHA for spambot detection.

Important note! In the near future this feature will no longer be optional and will be enabled for all Max Classic web forms. For now, the “opt-out” box will allow you to select certain web forms to be exempt from this security enhancement so you have some time to make any necessary process changes.
