

Landing Pages - Social share settings

The **Social Share Settings** in the landing page builder gives you a simple editor to format your landing page preview without the need to know Facebook's [Open Graph](#) markup language. A social share has four components:

- Image
- URL
- Title
- Description

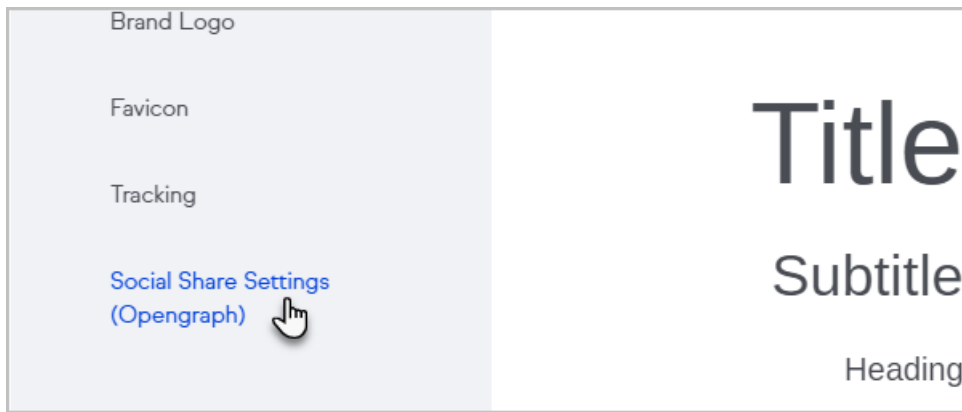

Pro-Tip! [Click here](#) to view Facebook's best practice guide in order to learn things like how to optimize your image for the highest viewing quality!

1. To view your current Facebook Share, navigate to the landing page builder and open the **Settings** menu

2. Click Social Share Settings (Opengraph)

3. Enter a title, URL, and description

A screenshot of the 'Social Share Settings (Opengraph)' form. The form has a white background and a thin border. At the top, it says 'Social Share Settings (Opengraph)'. Below this are three input fields: 'Title:', 'URL:', and a larger text area for a description. The description field contains the placeholder text: 'Add a short description that will show up in social websites like facebook when you share'. The form is currently empty of user input.

4. Click **Add an image** to select an image from your Company Images or upload one from your device

A screenshot of the 'Social Share Settings (Opengraph)' form, similar to the previous one. The description field contains the placeholder text: 'Add a short description that will show up in social websites like facebook when you share'. At the bottom left of the form, there is a green button with the text 'Add an image' and a mouse cursor pointing to it.

5. Click **Done**
 6. Publish your landing page
 7. Share your landing page link on social media
