

# Order form payment options

## Payment Plan

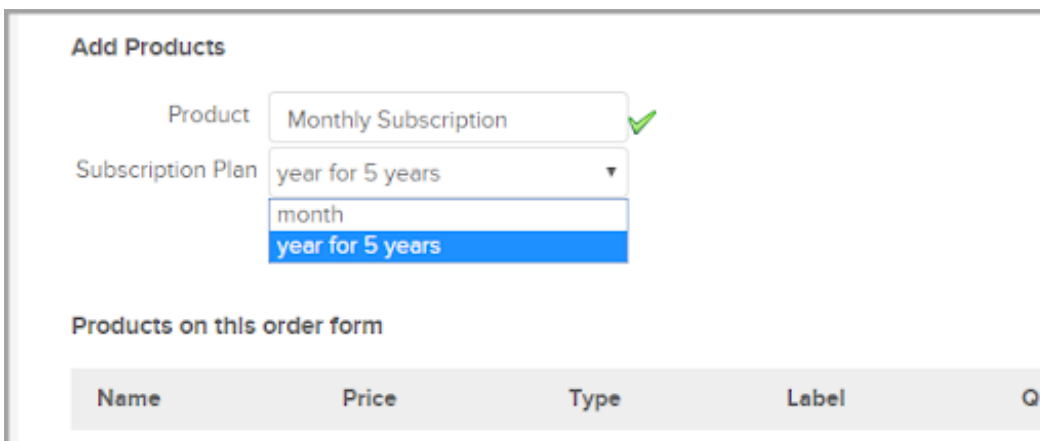

The payment plan will always offer the single payment option

The screenshot shows a portion of an order form. At the top right, a grey box displays the total amount: **\$1,500.00**. Below this, there is a section titled **Payment Plans**. It contains two radio button options:   
• **Single payment of \$1,500.00** (This option is selected and highlighted with a blue rounded rectangle)   
• **1 payments of \$1,500.00**   
Below the payment plans is an **Order Summary** section. It shows a **Subtotal** of **\$1,500.00**. To the left of the payment and summary sections, there are several empty input fields.

## Subscription

A subscription product can only have one subscription plan option on the order form. Meaning that there wouldn't be payment options that the payment plan would have.

The screenshot shows a form titled **Add Products**. It has two dropdown menus:   
• **Product**: Set to **Monthly Subscription** with a green checkmark to its right.   
• **Subscription Plan**: Set to **year for 5 years**. A dropdown menu is open below it, showing three options: **month**, **year for 5 years** (highlighted in blue), and another option partially visible.   
Below the dropdowns is a section titled **Products on this order form**. It contains a table header with the following columns: **Name**, **Price**, **Type**, **Label**, and **Qu**.

Products	Pri
<b>Monthly Subscription</b> \$250.00 / year for 5 years	\$2
<b>Subtotal</b>	

Billing Address	Order Summary
* First Name <input type="text"/>	Subtotal

## Product bundle link

A product bundle link can add multiple subscription plans and offers the customer the ability to delete the subscription plans they are not interested in.

Bundle Link Settings

Selected Products/Subscriptions:		
Name	Qty	Remove
Monthly Subscription - month	<input type="text" value="1"/>	Remove
Monthly Subscription - year for 5 years	<input type="text" value="1"/>	Remove

Checkout type to use:

Promo code to use:

Don't allow these products or subscriptions to be removed from the cart.

Customers can remove a subscription plan by changing the quantity to zero and clicking update.

**Pro-tip!** When using the Bundle links ALWAYS click "Copy". If you copy the link it by highlighting it, the link won't work.

- Don't allow these products or subscriptions to be removed from the cart.
- Remove all other products and subscriptions from the cart when this link is clicked.

Here's your bundled link:
