Ecommerce update: Responsive Order Form Templates are now available

We're excited to announce that your customers will now see Order Forms just as you intended. With new mobile responsive templates, your Order Forms look good on any device, regardless of screen size. Learn more.

Bug Fixes

- When the InvoiceService.createBlankOrder call was used to create an order via API and the default setting to send an invoice was set to yes, email receipts were not being sent when the order was paid. (Known Issue 2002209)
- Birthdays and anniversaries were displaying time information when merged into campaigns and broadcasts despite the fields not containing any associated time. (Known Issue 1941197)
- Some older order form and shopping cart themes prevented the new PayPal Smart Buttons from being displayed. (Known Issue 1949495)
- Order forms for products that cost $0 were showing PayPal Smart Buttons when no payment was necessary.
