Campaigns update: Weekday option for delay timers

Delay timers in your campaigns now include an option to wait for a set number of business days before carrying out your automation. By following regular business week logic and not counting weekend days in your delay timers, you can provide a bit more breathing room between your automations. [Learn more.](#)

Reports update: Date filters for the E-commerce > All Sales report

Get a better understanding of your sales for a rolling time period with filters for relative dates (e.g., 30-60 days from today, etc.) in the All Sales report. Not only will you get a clear picture of your recent sales activity, but you may even save time if you were previously creating these filtered reports manually. [Learn more.](#)

Reports update: Merchant account information in E-Commerce settings and Payments report

Your merchant account IDs are now visible in both your E-Commerce Settings, as well as your Payments report. In the past, it's been difficult to find this information to connect your web store to your Infusionsoft merchant account, or to see what merchant account was processing your payments. With this update, the mystery is solved. [Learn more.](#)

Bug fixes

- When accessed from the interactive or search views, some contact records would only load a blank page. ([Known Issue 2033709](#))
