Bug fixes

- Some contacts could not be sent campaign emails and their contact records would display an error reading "No Records were found". (Known Issue 2148286)
- Connecting multiple field timers in a sequence could result in an error reading "Must configure this timer to occur after previous timers." despite the timers being in chronological order. (Known Issue 2163729)
- Failed PayPal Commerce charges were recorded as "ERROR" instead of "FAILED" which prevented billing and failure automation from running as expected.
