

Global override

Global Override

Global Override is a manually set option that grants commission for a specific partner for all sales made, regardless if the referral partner is associated with the contact or not.

1. If there is a **Global Override** in the **Default Commissions** area at the top, this setting automatically adds the referral partner to all orders and gives the partner commission on all sales.
2. If there is a **Global Override** in one of the specific **Product Commissions** or **Subscription Plan Commission**, this automatically adds the referral partner to all sales made on that one-time product or subscription, regardless of whether the partner made the sale or not.

To remove a Global Override setting, click on the **[Override]** hyperlink, go to the Global Override area, delete the amount, and save.

Commissions Tasks

Default Commissions

Default commissions will be paid for products and subscriptions plans that do not have an override specified below.

Product	Price	Program	Level 1	Level 2	Pay If Unused	Global Override	Pay Type	Cycles	
Default	N/A	Affiliate Override	Not Set	Not Set	Not Set	Lead 25.0%	UpFront	N/A	[Override]

Product Commissions

Product Name ×

Product	Price	Program	Level 1	Level 2	Pay If Unused	Global Override	Pay Type	Cycles	
C-3PO mug	\$10.00	Affiliate Override	Lead 2.0%	Not Set	Not Set	Not Set	UpFront	N/A	[Override]
TEST RP	\$197.00	Affiliate Override	Not Set	Not Set	Not Set	Lead 25.0%	UpFront	N/A	[Override]
Apple Picking Services	\$20.00	Standard Commission Program	Lead 10.0%	Not Set	Not Set	Not Set	OnPayment	N/A	[Override]
			Lead \$10.00 Sale	Not Set	Not Set	Not Set			

Note: Changing this setting stops future orders from having the **Global Override** added to orders, but you may need to retroactively and manually fix orders to remove the referral partner from them if this setting was accidentally applied. Once the **Global Override** is turned off, you can click the Recalculate button on the order to remove the Referral Partner's **Global Override** commission.
