Contact search update: Email status criteria

You can now filter your contact search results by a contact's email status, something that previously only existed in the Email Status Report. With email status as an option alongside tags, custom fields, and more, you can find exactly who you're looking for. [Learn more.](#)

Security question requirement

As of 1/7, customers without security questions will be prompted to create them the next time they log in to their Keap account. This helps ensure that any customers who lose access to their account are able to reestablish it.

Bug fixes

- Whole-number custom fields are now created without any default value and display as empty fields. Previously, fields of this type would default to having a value of "0" when there wasn't a value applied.
 - In order to improve performance of the Marketing > Reports > Email complaint summary report, we have removed the graph from this report.
 - Custom statistics dashboard widgets were not displaying all of the columns from reports when the widget's SUM function was used.
 - Payments processed by Stripe created duplicate customer records in Stripe's portal.
-
