Reports update: Drag and drop to reorder columns

Customizing your report columns is easier than ever before. From any report, click the “Edit Criteria/Columns” button, then open the “Columns” tab. Each column can be clicked, dragged, and dropped into a new order. Plus, you can now search for fields when adding new columns to a report. And best of all, this works in contact searches as well.

Bug fixes

- When creating a new tag in Advanced Automation’s Apply/Remove Tag process, the field to enter a new category was not being displayed. ([Known Issue 2364456](#))
 - When setting up PayPal as a payment processor, the "Save changes" button did not save any changes.
-
