Bug fixes

- For customers using the Euro as their default currency, currency fields would display values in the US format with a comma to separate groups of thousands, but would switch to the EU format with a comma as the decimal point when saved, causing values like 1,500EUR to save as 1.50EUR ([Known Issue 2383722](#))
 - Clicking the “Checkout” button in a shopping cart would sometimes reset the credit card form and require the customer to enter their payment details again. ([Known Issue 2374913](#))
-
