This article applies to:

2-step authentication

Increase the security of your account right from the login page with 2-Step Authentication. This process will allow you to confirm your identity and trust multiple browsers across multiple devices. Learn more.

Keap Mobile Number (KMN) settings expansion

Easily access your KMN settings anywhere you write marketing texts including Broadcasts and Advanced Automations. This allows you to interact with your number and billing information, manage your opt-in request message, and manage your auto reply message (US Only). Learn more.

Bug fixes

- When sending a Broadcast, links added into a code block were not being assigned a tracking link

- Stripe 3D Secure payments which were not completed or that failed weren't showing the charge attempts
