## Bug Fixes

- Sometimes when creating a landing page, the page could not be selected in a campaign builder goal, and the status of the landing page reverted to draft on the list of pages.
  - Some saved reports using a date interval criteria of days, no longer populated results starting on 02/17/2022. Previously saved reports that were using a date criteria interval of Last "x number" days, were showing that selected option as invalid.
  - In the Tag Applications report, the drop down option for "Date Applied" column was missing.
-
