Keap Marketing Number Validation

Toll-free message verification is currently required in the U.S and Canada by telecom carriers. Next time you send a text message broadcast, you will be prompted with a verification form to add or update your information before using your Keap Marketing Number. [Learn More](#)

Weather Service Removal

We have removed the "weather service" feature which displayed weather and temperature information at the top of the contact record page. We will reallocate these resources to more impactful feature development.

Big Fix

- When an app's fallback locale setting is set to English (Australia), and you try to schedule a broadcast for a future date, the review and send page said that there were past due recipients.
-
