This article applies to:

New landing page builder now available in Max Classic

Previously only available in Pro and Max, we have introduced our slicker, more intuitive, feature-rich landing page builder to Max Classic! Learn more. [Learn more.](#)

Task Outcome column available on the Task Note report

You can now pull a report for the Outcome(s) of a Task instead of going into the Campaign Builder to see this info. [Learn more.](#)

Send test emails to multiple people at one time in the new email builder

The new email builder now allows you to send test emails to multiple people on your team. [Learn more.](#)

Create and apply multiple tags while customizing an email

You no longer need to leave the current email you are working on and go to a different part of the app to create tags. You can now set up tags and apply them on-the-fly while setting up an email. [Learn more.](#)
